DETAILED ACTION

Claims 1 and 19-22 are pending after the RCE of 2/3/05

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 19-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Isaksson et al (US 5,443,806).

Claim 1: Isaksson teaches a filter device (see figures 2-4) having plurality of hollow tubular filter elements (39 with respect to fig 3) disposed in a hollow manifold (37), hollow filtrate conduit (38), filter tube having permeable wall (fig 1) and filtration being from outside-in (see inlet 32 and outlet 33). The device is being capable of vertically and removably secured (see 315- support plate). Re the preamble of the claim, "for use in a three phase bubble column reactor", this is intended use and does not add to structure. A claim containing a "recitation with respect to the manner in which a claimed apparatus is intended to be employed does not differentiate the claimed apparatus from a prior art apparatus" if the prior art apparatus teaches all the structural limitations of the claim. Ex parte Masham, 2 USPQ2d 1647 (Bd. Pat. App. & Inter. 1987)

Claim 19: plurality of filter section – see figures.

Application/Control Number: 09/900,368

Art Unit: 1723

Claim 20: horizontal manifold (37) and vertical conduit (38)

Claim 21: filter elements vertically disposed (39) and horizontally arranged

Claim 22: filter elements are hollow cylinders with one end closed and other end open to the manifold – col 6 lines 21-21-30.

Response to Arguments

Applicant's arguments with respect to claim 1 have been considered but are moot in view of the new ground(s) of rejection.

Rejections based on Zievers and Sekellick references are withdrawn based on the applicants' argument that these references are incapable of outside-in filtration because of the difficulty involved in removing the slurry.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Krishnan S Menon whose telephone number is 571-272-1143. The examiner can normally be reached on 8:00-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wanda L Walker can be reached on 571-272-1151. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
